

Proper care and feeding of your bluetooth headset

Look mom, no hands!

Now you can receive calls, walk, talk, chew gum and free your hands up for more important things - like gesturing wildly with them.

Thank you for purchasing the fuse Bluetooth wireless headset. Our team of geeks and designers have worked long and hard to bring this lightweight, stylish, comfortable and cost effective Bluetooth headset to life. Use your fuse headset with any compatible device that supports Bluetooth wireless technology.

Welcome to the world of hands free!

Check me out!

- 1} Multi-Function button
- 2} LED Indicator
- 3} Charging port
- 4} Earpiece
- 5} Microphone

We all need to recharge.

If you're a first timer, you need to charge your device for more

than two hours to ensure the headset is fully juiced up for really important conversations. Each charging cycle may take up to 1.5 - 2 hours to reach full capacity.

We like to keep things simple, so if you see the LED indicate red, it's charging, and if the light turns off, charging is complete. If your headset has not been charged in a while, it may take 15-30 minutes for the red LED to become lit and the charge to begin.

Bonus! When the fuse headset is on and the battery becomes low, the LED will flash red and an audible reminder is given every 20 seconds.

Turning your headset On / Off

Turn On: Press and hold the multi-function button for 4 seconds. The LED indicator will flash blue 4 times, and you will hear a sound as the headset turns on.

Turn Off: Press and hold the multi-function button for 4 seconds. The LED indicator will flash red twice, and you will hear one beep as the headset turns off.

Finding your perfect mate

1} It is important to sync your phone with your bluetooth headset before you're able to use it - this is called "pairing"
It's easy to do:

A. Ensure the headset is off. **This is very important! See above in case you have forgotten how.**

B. Press and hold the multifunction button for 6 seconds until the LED indicator flashes between blue and red.

C. Your phone should have a menu option for searching or detecting a Bluetooth device. Each phone does this a little differently. Do a google search on your phone model if you've already recycled the user manual.

D. Once your phone recognizes or detects your new Bluetooth headset, enter your pin code "0000".

E. Eureka! Your Bluetooth headset is now ready to use!

2.} Once paired and connected, the headset will automatically connect to the device whenever you turn the headset on, provided that the device is within range.

Let's light this candle.

Making a call is easy: Dial your phone and call in the normal way when the headset is connected to the mobile phone.

Answering a call is just as easy: Press the multi-function button once to answer the call and say “Hello”, “Howdy” or “Aloha”.

Ending a call: Say goodbye and then press the multi-function button once.

Geek Speak Specifications

- Bluetooth V2.0+EDR
- **Support Profiles:** headset profile and hands free profile
- Class 2
- **Operation Range:** 10 meters (extended)
- **Talk Time:** up to 3.5hrs
- **Standby time:** up to 60 hrs
- **Charging Time:** 1.5 hrs
- **Battery:** Rechargeable 65mAh Li-Polymer battery

Don't do anything ridiculous and other safety precautions

- To avoid any damage or device malfunction, do not drop the device from high places.

- Keep the device away from humidity, water and any other liquid. If the device is exposed to water, moisture and other liquid, do not operate it to avoid damage to the device or yourself.
- Do not place or keep this device near any heat source, such as, direct sun light, radiators, stoves or other apparatus which produces heat. It may cause explosion, degrade the performance and/or reduce battery life.
- Do not modify, repair or disassemble the device. Doing so will void the warranty.
- Do not place heavy objects on the device.
 - Use only the supplied and approved charger.
